DETAILED ACTION

Amendment

1. Acknowledgment is made of applicant's Amendment, filed 20 January 2005. The changes and remarks disclosed therein were considered.

Claim 3 has been cancelled. Therefore, claims 1, 2 and 4-11 are pending in the application.

Drawings

2. The replacement drawing sheet for Figs. 6 and 7 was received on 20 January 2005. The drawings in the replacement drawing sheet are acceptable.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

4. The application has been amended as follows:

The title has been replaced with the following (the brackets have been removed):

--POWER SOURCE DETECTOR--

Allowable Subject Matter

5. Claims 1, 2 and 4-11 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, the prior arts of record do not disclose or suggest a method as recited in claim 1, and particularly, detecting a power level of the second power source and providing a second output signal to indicate a power level of the second power source when the first output signal indicates that the first power source is at the pre-determined power level (i.e., the detection of the second power source depends on the result of the detection of the first power source).

Regarding claim 2, the prior arts of record do not disclose or suggest a circuit as recited in claim 2, and particularly, a first state of the second output signal allowing the DRAM to operate at a first data power level, and a second state of the second output signal allows the DRAM to operate at a second data power level (i.e., the operating power level of the data section of the DRAM, as distinguished from the operating power level of the DRAM as a whole, including non-data sections of the DRAM, is determined by the state of the second output signal).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jung (John) Hur whose telephone number is (571) 272-1870. The examiner can normally be reached on M-F 6:30 AM - 3:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Elms can be reached on (571) 272-1869. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
